Short Description of the Company	<p>Business Intelligence Architects is a software house and is an innovative IT company. We are organizing own startups (e-commerce, mobile apps, local businesses) and developing software for external clients. We have created web applications for startups which quickly gained more than million users. Solutions created by us are flexible and scalable, therefore they are quickly deployed to different countries. The applications which we created are now operating in 12 countries in Europe, North America and Asia, and are visited by millions of users every day. Our customers are for example the World's biggest daily deals site (we have created the Goods, Getaways and Events platforms) or the first travel club in Poland (we have created the platform together with supporting systems).</p>
