

Baltic Research Programme
3rd call in Latvia

List of the projects selected for funding

No.*	ID	Title	Project promoter	Budget
1.	EEA-RESEARCH-60	Integrated model for personalized diabetic retinopathy screening and monitoring using risk-stratification and automated AI-based fundus image analysis (PerDiRe)	University of Latvia	1 000 000,00
2.	EEA-RESEARCH-64	Improving adaptability and resilience of perennial ryegrass for safe and sustainable food systems through CRISPR-Cas9 technology - EditGrass4Food	University of Latvia	1 000 000,00
3.	EEA-RESEARCH-85	Waste-to-resource: eggshells as a source for next generation biomaterials for bone regeneration	Riga Technical University	799 787,00
4.	EEA-RESEARCH-92	Aluminum in circle economy - from waste through hydrogen energy to alumina" – AliCE-Why	Institute of Solid State Physics	800 000,00
5.	EEA-RESEARCH-164	Exploring the molecular mechanisms behind the effects of physical exercise on breast cancer prevention (CancerBeat)	Latvian Biomedical Research and Study Centre	1 000 000,00
6.	EEA-RESEARCH-165	Innovation in concrete design for hazardous waste management applications	Riga Technical University	865 661,25
7.	EEA-RESEARCH-173	Novel biorefinery concepts for valorization of lignocellulosic residues	Riga Technical University	800 000,00
8.	EEA-RESEARCH-174	Quantitative data about societal and economic transformations in the regions of the three Baltic States during the last hundred years for the analysis of historical transformations and the overcoming of future challenges	Vidzeme University of applied Sciences	999 092,70

* Projects are arranged in the order of number of the project application
